Training & Certification Management

SMART PLATFORM FOR TRAINING & PROFESSIONAL CERTIFICATIONS

MACHINE LEARNING PROJECT - CRISP-DM PHASE 1

The team:

Sami Bousnina

Yassin Jendoubi

Roua Dhafer

Nour Mezgar

Anas Selmi

INTRODUCTION & PROJECT CONTEXT:

- The job market is changing very fast.

- Professionals need continuous training and certifications to stay competitive.

Training platforms must manage:
- Many users
- Different training programs
- Certifications and evaluations

ForMe
Training & Certification Management

INTRODUCTION & PROJECT CONTEXT:

Our project proposes a smart platform that helps users find the most relevant trainings using Machine Learning.

ForMe
Training & Certification Management

PROBLEM STATEMENT:

Current training platforms have several problems:

- Too many training options → users feel lost
- No personalized recommendations
- Difficult to match trainings with user skills
- Low engagement and completion rates

ForMe
Training & Certification Management

MAIN PROBLEM

How can we suggest the best training courses for each user based on their profile and skills ?

EXISTING SOLUTIONS & THEIR LIMITATIONS

Coursera

LinkedIn Learning

Udemy

Moodle

PERSONAS & USER NEEDS:

Persona 1: Learner

- Wants relevant training for career growth
- Needs personalized recommendations
- Wants recognized certifications

Persona 2: Administrator

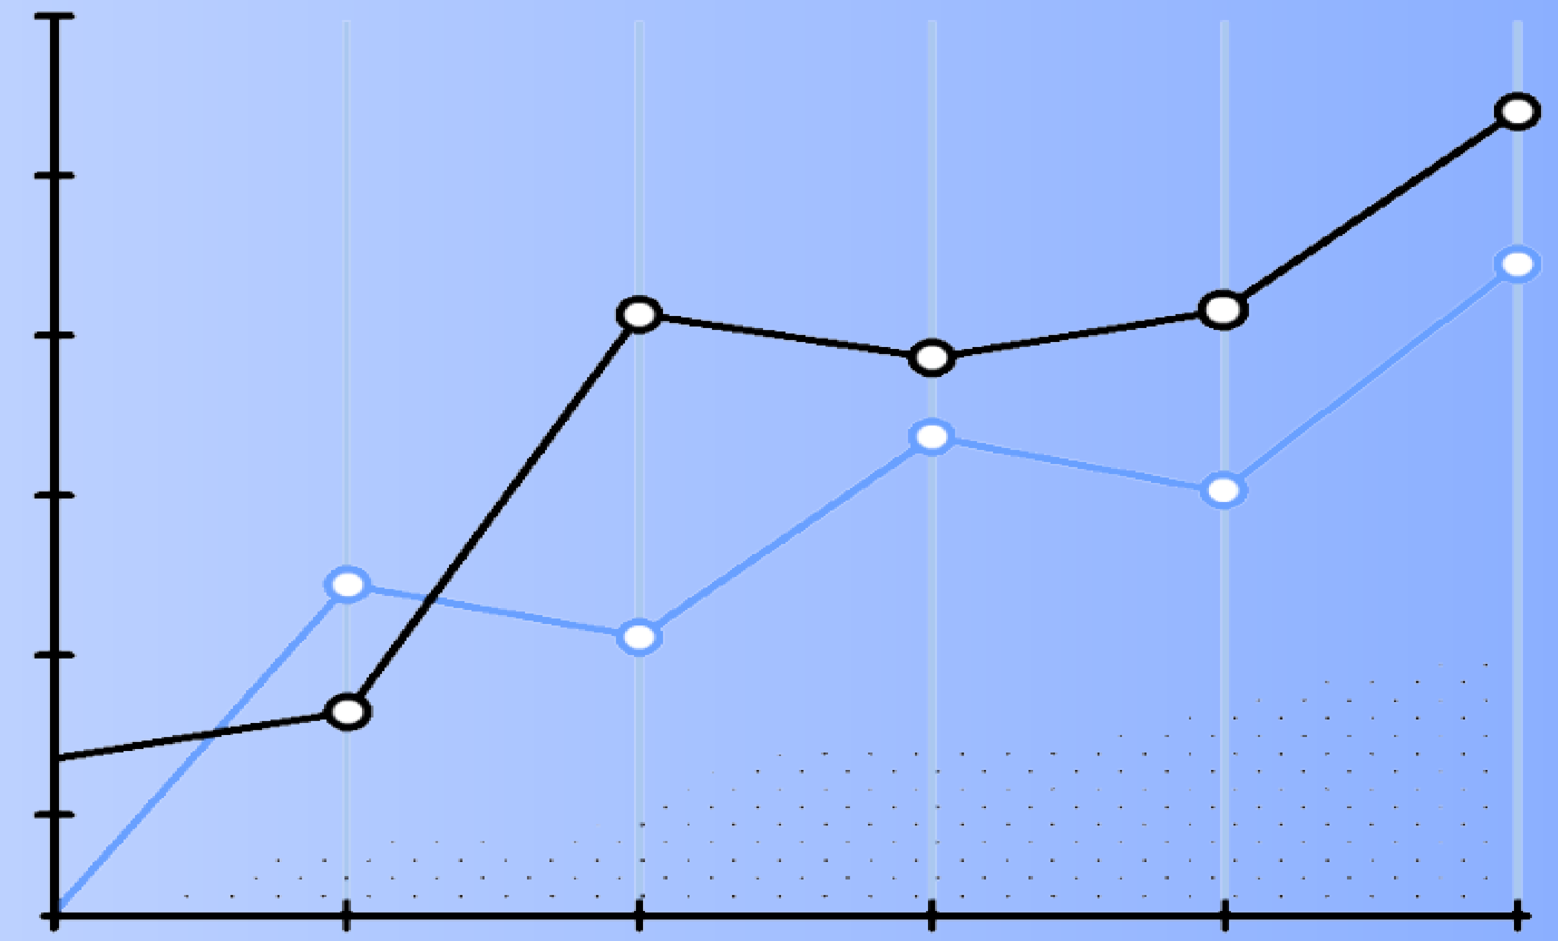
- Manages trainings and users
- Wants analytics and performance tracking

BO VS DSO

- BO = Business goals
- DSO = ML and data goals to achieve them

BUSINESS OBJECTIVES (BO)

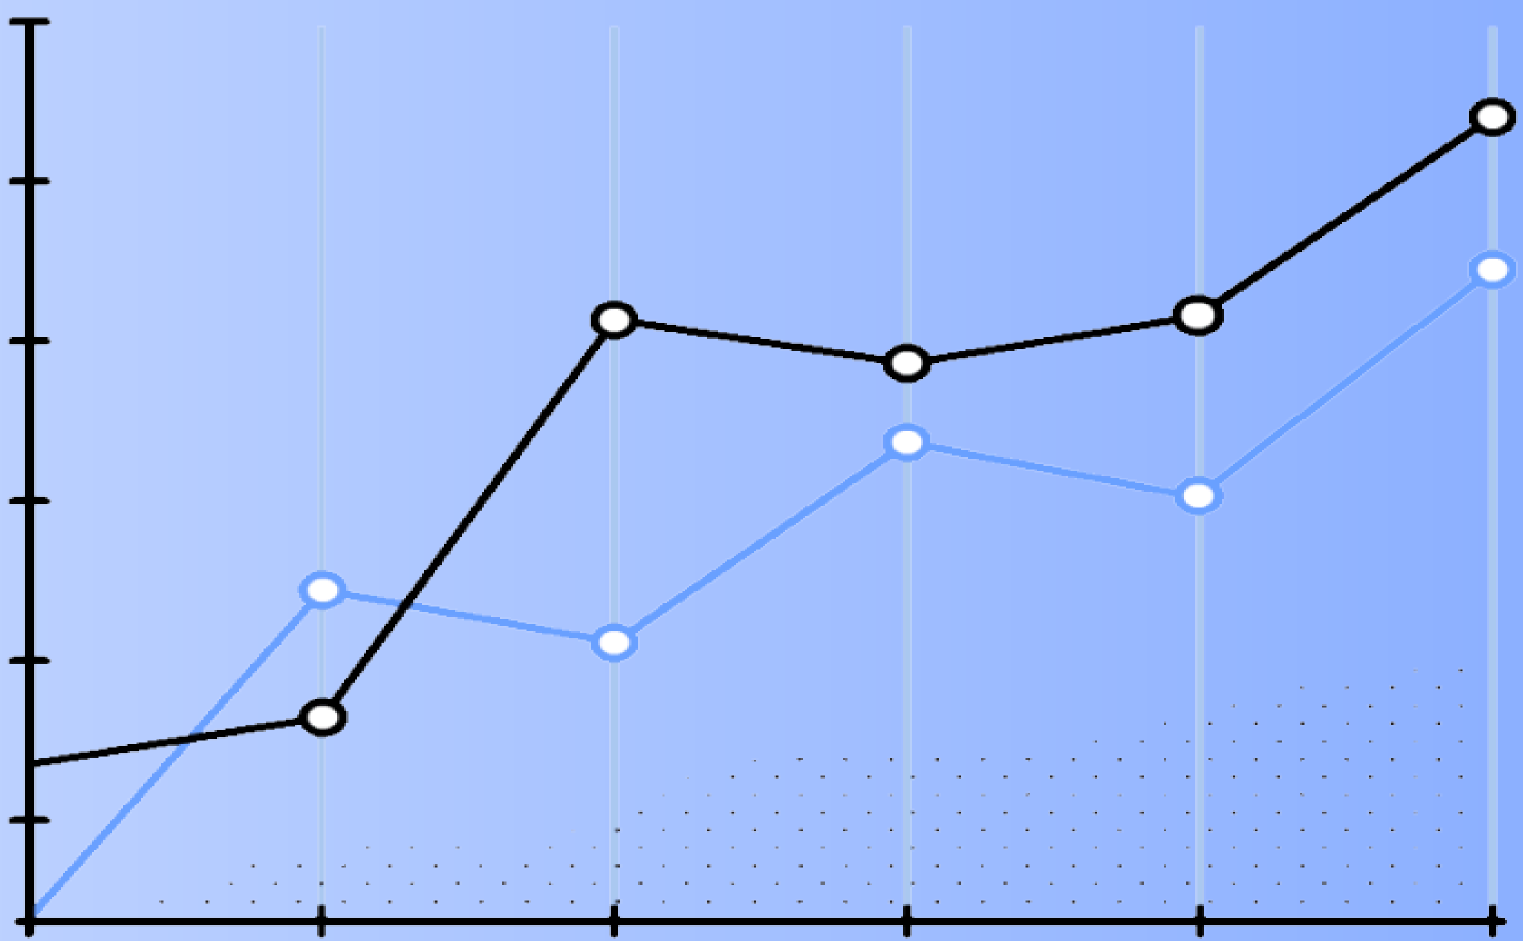
- Improve user satisfaction
- Increase training completion rate
- Optimize training management
- Provide personalized learning paths



ForMe
Training & Certification Management

DATA SCIENCE OBJECTIVES (DSO)

- Build a recommendation system
- Analyze user profiles and skills
- Predict the most relevant training for each user
- Improve recommendation accuracy over time



CRISP-DM METHODOLOGY

1)Business Understanding (current phase).

2)Data Understanding

3)Data Preparation

4)Modeling

5)Evaluation

6)Deployment

PROPOSED SOLUTION:

Our solution:

- A smart training management platform
- Machine Learning recommendation system

Personalized suggestions based on:

- Skills
- Previous trainings
- Certifications
- User profile

PROPOSED SOLUTION:

Possible ML approaches:

- Content-based filtering
- Collaborative filtering
- Hybrid recommendation system

ForMe
Training & Certification Management

ForMe: A Smarter Way to Learn

CONCLUSION

- Training personalization is a real problem
- Machine Learning can improve user experience
- CRISP-DM helps structure the project
- Our project focuses on intelligent recommendations
