

ForMe

Learning that knows who you are.

01

Achieve *certified learning success* — without wasted time, generic content, or being left behind.

02 — THE PROBLEM

Who is affected & why it matters

Students and professionals frequently struggle to progress on generic learning platforms — causing over **90%** to abandon their courses, wasting time, money, and career opportunities.

Generic Content for Everyone

Same course for every learner — zero adaptation to level or goals.

One-Size-Fits-All Exams

Tests memory, not real understanding — causing unfair failure.

Zero Guidance After Failure

Red mark — no explanation — no next step. They give up.

03 — THE SOLUTION

How ForMe works — 5-step AI journey

ForMe is an AI-powered learning platform that builds a unique journey for each user — recommending the right courses, generating personalized exams, and turning every mistake into a teachable moment.

Achieve *certified success* — without the content that was never meant for you.

ForMe does not simply host content. It **actively adapts in real time** to each learner's goals, pace, and progress — like having a knowledgeable friend who never gives up on you.

04 — THREE KEY BENEFITS

What learners gain

1

Save up to 40% of study time by focusing only on content that matches your actual level and goals.

2

Understand faster and retain more with AI-generated exams and instant explanations that turn mistakes into learning moments.

3

Stay motivated and reach certification with a guided, adaptive journey that evolves with you.

05 — UNIQUENESS

Why choose ForMe?

Competitive Advantage

Unlike **Coursera**, **Udemy** or **edX** — which deliver identical content to every learner — **ForMe is the only platform** that acts as a personal learning companion, adapting every course, exam, and feedback in real time to each specific user.

Others: Same course for everyone → you adapt to the platform

ForMe: Everything adapts to you → like learning with a friend

06 — EVIDENCE

Proof of credibility

MCKINSEY RESEARCH

90%

of learners abandon online courses on non-personalized platforms — the exact problem ForMe solves.

MIT EDUCATION LAB

+30%

improvement in student outcomes when personalized learning replaces one-size-fits-all instruction.

PROJECT VALIDATION — ESPRIT

10

fully integrated modules built & validated by a 5-member engineering team. Working proof of concept.

Join us in building the future of personalized education.

Stop learning for the platform. Start learning for yourself.
